

Dr. Robert J. Monson

Principle Engineer, Research and Development

Robert J. Monson has been working as a development engineer for 24 years, and also has done adjunct instruction at various Universities since 1992. He received his B.M.E. from the University of Minnesota Institute of Technology in 1985, and his M.M.S.E. from the University of St. Thomas in 1991. He completed his Ph.D. in Industrial Engineering at the University of Minnesota and specialized in the area of Project Management.

Bob has published several articles on topics related to his engineering design work, and is the recipient of several national design awards. He is the holder of 65 U.S. patents with several patents pending at this time.

Bob is employed with Lockheed Martin in Eagan, Minnesota. He is a Principle Engineer and IRAD manager for Technical Operations. Previously, Bob has developed equipment for both the Agricultural and Railroad industries.
